

**THE
TRAVELLING
NUT**

KEEP EXPLORING THE GOOD STUFF!

JUST THE GOOD STUFF!

The story of The Travelling Nut

The palm Tree has found an amazing way to survive and reproduce itself; as its fruit, the coconut is built to travel.

Taken by the currents of the sea, it will travel the world and wherever faith takes it, and the conditions are optimal, a new palm tree can grow and life begins

Not just a new life for the palm tree but also opportunities for us as a human species. We can build houses from the trunks and leaves, make rope out of the bark to weave clothes, or catch fish and of course eat and drink the fruit.

The beauty in all of this; nature has arranged everything for us, it has a system, where when in balance, absolute symbiosis can occur.

The only thing we need to give back in exchange for being blissfully rewarded with an amazing variety of delicious fruits and vegetables, is to spread those same nuts and seeds, so here legacy carries on.

And that sounds like a pretty good deal to us!

Like the coconut we love to travel and discover new places and flavours.

So whenever we fell in love with a new flavour, we went on a quest to find the best way to enjoy its taste daily.

Most of the fruits we love don't grow here where we live in Amsterdam, so we searched far and wide for alternatives in order to share these amazing flavours with our friends.

We thankfully found a small group of like-minded independent enterprises that either produce or import amazing products. These beverages are free of additives with smart sustainable package designs allowing for longevity that requires no preservatives to hold their taste and nutrients inside.

We formed a small hand-picked selection of drinks that we love and want to share with you, produced under socially and ecologically compatible conditions, preserving a balance that allows us to live in harmony with nature.

Join us on our adventure in discovering this world of amazing flavours!

The Travelling Nut Team
